

Undelete 11 New Benefits

"I love the new modern-looking interface. It's MUCH easier to navigate. It's MUCH easier to figure out how to do things. I never really liked the dark blue UI of the old version. Neither did I like having to click a non-intuitive button and get a drop-down list of things to do, never really sure that I was choosing the right one. You've fixed ALL of those things in the new version. I REALLY like it."

Bob Sauers, Executive Director, PCTEST Engineering Laboratory Inc.

"The new UI looks good to me. More simplified format so everything is right there. Click file, hit 'recover', and you're done."

Anonymous, Sr. IT Manager, Finance and Insurance Company

"Undelete saved my bacon many times."

"The new Undelete 11 user interface looks fantastic, much different than the old one. Menu flow looks easy to use. Old version was a little hard to figure out how to navigate at first so looks like a big improvement."

Charles Chang, Support Technician, Information Technologies, ALERT

"I like the new Undelete 11 with the explorer interface, layout with toolbar and ribbon. More user friendly, better for someone who is less technical. Simpler and easy to use."

Louis Chouinard, Director of Information Services, Gestion Orion Ltee/RSS
