

V-locity Helped Maximize Nimble Storage Performance

“With V-locity and Nimble Storage together, it’s like having lightning performance at both ends of the spectrum. The combined solution delivers multiple layers of speed for both read and write operations... Even if Nimble has to go to all the way down to spinning disk as last resort to get the data, V-locity ensures minimum disk latency as the data is retrieved with the fewest number of I/O requests possible.”

JAMIE RABENSTEIN
IT MANAGER
VICTOR COMMUNITY SUPPORT SERVICES

“With V-locity I/O reduction software on our servers and Nimble storage for our backend, we feel we are getting best of breed performance at lowest possible cost.”

CHUCK KEITH
DIRECTOR OF INFRASTRUCTURE
SUPREME LENDING

“V-locity ensures maximum optimization and lightening performance when combined with our Nimble storage. The ‘Set It and Forget It’ functionality is great. I simply dip into the Management Console every few weeks, just to satisfy myself that everything is ticking over nicely. And the extra re-assurance from the ConduSiv Engineers during our free, periodic review sessions gives us the confidence that we’re getting the right info out of the Console. You can’t argue with the dashboard report data, V-locity definitely does what it says on the tin!”

CHRIS MCARDELL
DIRECTOR OF IT SUPPORT
HEALTHSPAN, LTD.

“Our Nimble Storage SAN array was installed in 2014 and with the use of V-locity in our environment, we’re going to be able to run the SAN for its full lifecycle of 7 years. I’m hoping to be able to hold on to it until I absolutely have to let it go.

The software running on our SAN continues to show impressive results, with an average of 36% of write I/Os being eliminated and an average of 40% of the read I/Os being eliminated on our 23 systems.”
