

V-locity Helped Solve CRM Performance Issues

“We no longer have latency issues—everything runs as efficiently as possible. Considering the number of users, the size of the files they work with, and the I/O-intensive workload we handle, there’s a lot of potential for complaints. Since V-locity, we have none—those issues don’t exist.”

“With V-locity, we’ve seen an 80-90% improvement in response time for SQL, email, CRM, and other critical apps.”

“I wouldn’t run our environment without it. V-locity is proactive, it’s seamless, and I’d recommend it to any organization with significant I/O demand along with users that need top performance.”

Robert Del Vecchio, IT Infrastructure Manager, Creative Office Pavilion

“Since we’re no longer dealing with so many small split I/Os and random I/O streams, V-locity has enabled our CRM and ERP systems to process twice the amount of data in the same amount of time. The best part is that we didn’t have to spend a single dime on expensive new hardware to get that performance.”

Kevin Schmidt, Director of IT, I.B.I.S., Inc.
